- b. **147.705(-) NT6T** Goleta: RFC 2016-018-G. New repeater. Test coordination ends 7/2017.
Test coordination cancelled due to repeater not on the air due to actual use was cross band 2m input to 70cm output frequency. NT6T was a cross band repeater used on a non-continuous basis. TASMA does not coordinate cross band repeaters and encourages NT6T to use the itinerant frequencies defined in the band plan. (4-0-0)

Unable to coordinate due overlapping coverage with multiple repeaters.
 - c. **147.705(-) K6ECS** Running Springs: Interference 2017-015. Complaint against NT6T.
Interference complaint appears to be against an uncoordinated transmitter on the frequency pair. TASMA encourages K6ECS repeater to work with the ARRL and FCC to remediate the interference as the interference is not originating from a coordinated source. Complaint closed as TASMA mediates only on coordinated interference repeater issues and NT6T is not a coordinated repeater. (4-0-0)
